THE FLAME WELCOMES YOU AND YOU ALREADY FEEL AT HOME

We are just outside Bergamo, home of the famous Moscato di Scanzo wine, located on the foothills of the Orobie Alps.

We venture into the gentle slopes of the hills until we arrive here, where an elegant and contemporary villa stands in a well-kept garden.

From the entrance, we are welcomed by the Panoramic fireplace, protagonist from the very first moment. The house was designed with the idea of having a fireplace to enjoy at any time of day, a companion for the long winter days. Its unique presence makes it a piece of furniture, even a possible sitting area for any time of year.

The fireplace is absolutely the centerpiece of the house, set into the three steps that separate the living room from the dining area, rising up to the roof, its majestic chimney also heating the loft.

The M360T fireplace was customized according to the interior designer's design, with its own identity, to be incorporated in a way that is consistent with the overall design of the rooms. It is recessed into the wooden loft, with a stone base. Warm shades of gray and chocolate brown are the common thread running through the rooms.

The fireplace is an expression of shape, function and emotion. The flame that illuminates and warms the room and the crackling of the wood make it a living presence.
The living room, dining room and kitchen create a large common area with the fireplace at its center, which becomes a unifying element.

The fireplace remains a symbol of warmth and beauty, enriched by technological features. The crackling of the wood is no longer just poetry but, thanks to modern technology, it has become a safe choice, with increasingly clean and efficient combustion.

This model is the perfect combination of technological innovation, sophisticated design, wood fire and handcrafted majolica surround tradition.
It is a pleasure to enjoy the emotion of the crackling wood. The panoramic sliding glass door, which disappears completely into the base, is motorized with push-button controls, and without any profile, the view of the fire from every point in the house is spectacular.
