ON THE BRENTA RIVIERA IN THE CENTER OF A BARCHESSA, THE BERGEN FIREPLACE

A careful renovation of a prestigious barchessa along the Brenta Riviera, a famous area between Venice and Padua known for its historic Venetian villas and picturesque river landscapes, has given new life to an evocative space that has become a spacious living room with a contemporary and welcoming atmosphere, featuring the Bergen fireplace.

The space is dominated by warm, refined architecture, with exposed wooden ceilings and original beams that evoke the area's building tradition, reinterpreted in a modern key. The dark, uniform flooring contrasts elegantly with the natural materials of the ceiling, contributing to a sophisticated aesthetic.

The living area is laid out in a fluid and open manner: in the background is a spacious dining room with a solid wood table and modern chairs, ideal for entertaining guests in an elegant yet informal setting. To the right is a sitting area with gray fabric sofas, perfect for relaxing or chatting.

At the center of the living room stands the large Bergen suspended panoramic fireplace, with large glass panels that allow a 360° view of the flames, creating a spectacular focal point and a cozy atmosphere. The element combines functionality and design, becoming the visual and symbolic heart of the room.

The BERGEN fireplace of the PANORAMIC range is a fireplace with a striking visual impact which, thanks to its technological features, is an example of a perfect combination of technological innovation, sophisticated design, and fireplace and handcrafted majolica surround tradition.

BERGEN becomes the natural focal point of the room, around which to gather and share the emotion of crackling wood while enjoying the pleasant warmth of fire and a superb view of the flame surrounded by the 360° panoramic glass free of metal profiles. The vertically sliding panoramic glass, which folds away completely into the base, is motor-driven with button controls. Among the distinctive features are the large black steel hood, suspended by a custom-made bracket, and the base clad with precious large hand-crafted Majolica panels surrounding the firebox.

Large windows allow natural light to flood the space, enhancing the volumes and offering glimpses of the surrounding green landscape. The visual and material connection with the outside recalls the charm of the Riviera, where nature, architecture and culture intertwine in a timeless balance.
