THE SPECTACLE OF FIRE AT THE FOOT OF THE MARMOLADA

We are on the Marmolada: eternal ice, iconic peaks and places of great history, this unique mountain with its glacier is the queen of the Dolomites. Between the peaks of the Marmolada, which at 3,343 meters high is the highest mountain in the Dolomites, stands the Rifugio Burz hut, at 1,936 meters above sea level, on the Sellaronda circuit.

The spectacle of fire, the excitement of the crackling of wood with its warmth come to life in the heart of the Rifugio Burz, an elegant structure which with large windows welcomes the Panoramic fireplace that becomes the center of the refreshment area.

The flame, dancing in the center of the Panoramic fireplace, and the warmth it emanates are a natural invitation to sit around the fire. A fireplace in the center of the room, suspended, with a panoramic glass without profiles for a spectacular view of the fire. The hood hangs from the wooden roof, each bracket made according to design specifications.

The structure of the Rifugio plays with the contrasts of different materials: the natural ones of wood and stone, large glass windows and black steel elements that also echo the finish of the fireplace.

The PANORAMIC M360Q is a fireplace with a great scenic impact and thanks to its modern technology it ensures optimal combustion with low emissions to protect the environment. It is the perfect combination of technological innovation, sophisticated design, and tradition of the fireplace and surround made to a specific design with black stone top.

The vertically sliding panoramic glass, which folds away completely into the base, is motor-driven with button controls.

And so the fire at the center of the room becomes its protagonist by bringing people together as in the past
