

PANORAMIC

**A CUSTOMIZED
FIREPLACE AT THE
CENTER OF YOUR
RELAXATION**

 **PIAZZETTA**

GIVING ELEGANCE AND WARMTH TO THE VERANDA WITH A PANORAMIC M360 Q

Let us immerse ourselves in the refined atmosphere of a residence in the Varese area, where the art of design and the enveloping warmth of the fireplace blend harmoniously.

We find ourselves among the hills, near Lake Varese, a city that has such a large number of parks that it has been nicknamed the "garden city". The entire province is enriched by lakes and mountains that make this peak of Italy a peaceful and rejuvenating place.

An evocative setting, captured in the lens of a camera that immortalized the timeless charm of a fireplace.

It only takes a moment, the view of the fire through the large windows, to already feel the embrace of warmth, to be fascinated by this fireplace. But only once you enter this veranda can you fully appreciate the beauty of the Panoramic M360 Q.

An iconic model that stands at the center of an originally furnished room that is anything but classic. The **Cor-ten** shade of the **hood** and **square base** is a refined choice that matches its earthy hue with the stone floor and mosaic panel that decorates one of the walls.

In the M360 Q fireplace in this realization we can appreciate a **unique cladding**, chosen by the owner and **custom-made** for his own unique fireplace.

The M360 Q was inserted into a **bench with large Majolica** panels, also by Piazzetta, in **Verde Pennellato** color. The panels were made to measure and chosen from the wide range of customizable colors, a possibility offered thanks to the **artisan craftsmanship of Majolica** that takes place in the company's in-house factory where new unique pieces come to life every day.

On this refined Majolica top, the glow of the fire is reflected, absorbing its heat and contributing to its very pleasant diffusion, which also lingers over time with its gradual release.

A bench that is not only decoration, but also a functional element on which to sit and feel embraced by the warmth and crackling of the fire.

The **hood** rises up to the ceiling passing by the loft made with an original indoor mesh.

The **fireplace** thus becomes the beating heart of this veranda, a place in which to enjoy moments of pure well-being and relaxation.

As in all Panoramic models, the **rise and fall glass panel is concealed inside the base**, a motorized movement that is operated by push-button controls. And as with this entire prestigious product line, the key word for the M360 Q model is **customization**.

Design and technology come together creating a range of unique fireplaces.

The perfect and harmonious **geometries**, the **wide fire pit**, the characteristic **glass panels without metal profiles** that disappear into the base thanks to a motorized system.
